-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 26 February 2004.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Response to Amendment

1. Applicants' amendment filed February 26, 2004, has been entered and made of record.
2. Applicant's arguments, see Page 15, last paragraph through Page 17 last paragraph of the remarks filed February 26, 2004, with respect to Claims 1, 22 and 42 have been fully considered and are persuasive. The rejection of Claims 1, 4-7, 9-20, 22, 25-28 and 30-44 has been withdrawn. However, in further consideration Claims 1, 4-7, 9-20, 22, 25-28 and 30-44 have been rejected based on the nonstatutory double patenting over Claims 1-18 of U. S. Patent No. 6,043,823

Double Patenting

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

4. Claims 1, 4-7, 9-20, 22, 25-28 and 30-44 are rejected under the judicially created doctrine of double patenting over claims 1-18 of U. S. Patent No. 6,043,823 since the claims, if allowed, would improperly extend the "right to exclude" already granted in the patent.

The subject matter claimed in the instant application is fully disclosed in the patent and is covered by the patent since the patent and the application are claiming common subject matter, as follows:

The following limitations are recited both in the instant application and U. S. Patent No. 6,043,823:

discriminating means for extracting a predetermined region by using a feature of pixel of the image data input from the input means, and for discriminating an attribute of the region;

determining means for, on the basis of the distribution of the regions attributes of which are discriminated by the discriminating means, determining whether or not the type of the image data is a rectangular discriminative region; and

conversion means for performing image conversion when the determining means determines that the predetermined region extracted by the discriminative means is the rectangular discriminative region, said conversion means converting the image to lower resolution or increasing a compression rate of the image where the attributes of the region discriminated by the discriminating means is one of a dot photo region and a

continuous photo region, and converting multi-valued data of the image into binary data to reduce the quantity of information contained in each rectangular discriminative region when the attributes of the rectangular discriminative region is such that it contains only black letters.
